

MyMajors Advisement Report

Prepared for
Mary Poppins

Report Generated on:
October 14, 2014

MyMajors is a knowledge-based system that computes your College and Career Plan based on your individual Academic Aptitude and Interests. The MyMajors Advisement Report will help you create your academic plan toward completing your degree. Your recommendations were based on: Grades, Course Enjoyment, GPA, Achievement Tests, Interests and Personality.

How were My Majors calculated?

The MyMajors assessment is a knowledge-based program developed by Dr. Fritz Grupe, Professor Emeritus from the University of Nevada, Reno. The results are based on four key measures to find the right program for you:

Academic Achievement

You have completed and enjoyed courses that are vital to that degree program.

Aptitude

Your ability to thrive and enroll in the degree program at a college and university.

Interests

Do you enjoy the activities and tasks associated with this major?

Personality

Do your emotional and psychological strengths and weaknesses collaborate with this major?

"MyMajors is designed to emulate a human academic advisor. The program recommends actual college and university majors (not general categories or personality types). MyMajors is not a psychological or personality instrument. It takes into account a student's academic abilities and personal interests to create a successful plan to become college and career ready."

Dr. Fritz Grupe, Creator of MyMajors
Professor Emeritus, University Nevada, Reno

My Report will help you create a College and Career Plan towards completing your degree.

Based on the information you provided MyMajors, we have matched you with Majors, Colleges and Careers. Your recommendations were based on: **Grades, Course Enjoyment, GPA, Achievement Tests, Interests and Personality.**

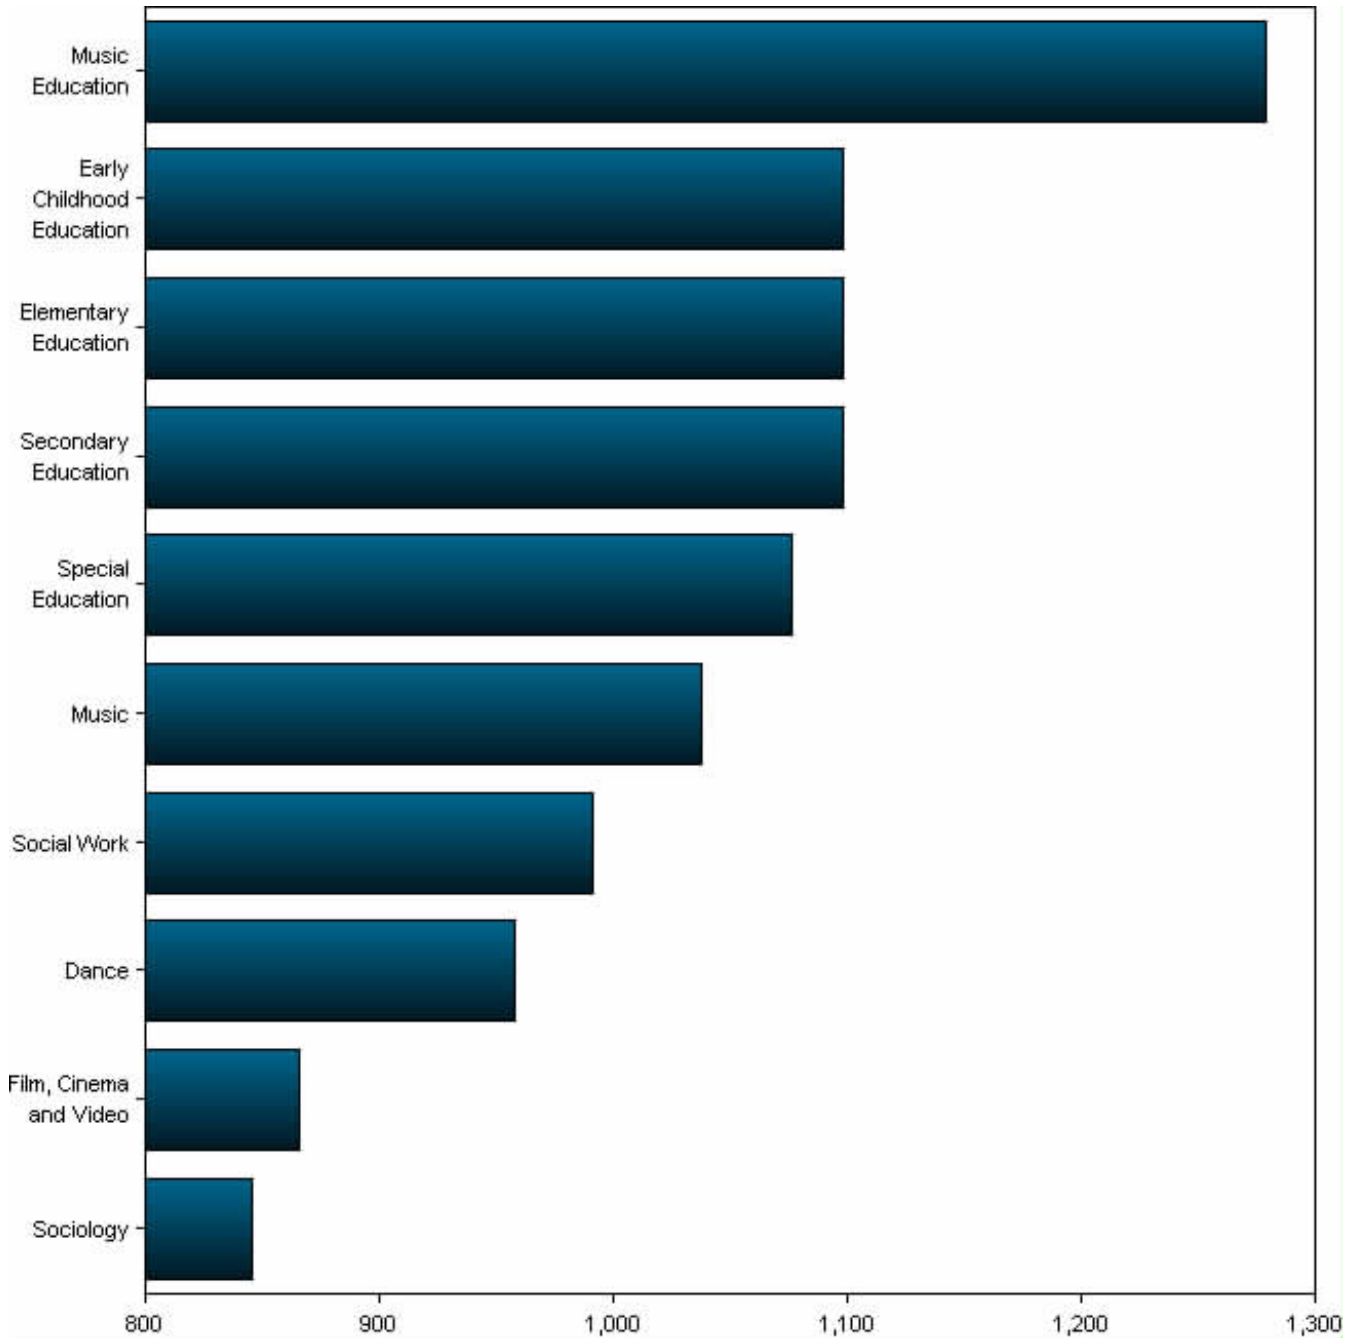

Each component is scored and then weighted to produce accurate recommendations. We measure interests and your personality to show your likeliness to enjoy your degree but also measure your academic achievement to excel in the specific major. Your score for each major and more details about your recommendations are listed on the following pages.

"Students with a declared major have higher graduation and retention rates compared to undeclared majors." (Colorado State University)

Recommended Majors

The chart above displays your MyMajors recommendation scoring. Your score for each major was based on your Grades, Course Enjoyment, GPA, Achievement Tests, Interests and Personality.

My Recommended Majors

50% of students change their major at least once. This list of majors will help you stay prepared to declare your major and prepare for the future.

1. Music Education

Your Score: 1279

Individuals who choose music education as a major are in for a field full of diverse styles, methods, cultures, and themes in varying types of music. Virtually any type of musical instrument and ways of playing it can be learned in this major, and the experience is often carried on throughout the Major. Individuals will be able to instruct and mentor their students, as well as know many different ways of doing so. Music education majors may work in a public school, a private music school, or may give individuals private lessons.

Student Profile:

This major is a favorite of people who, obviously, have a love of music, and wish to give that gift to others through instruction. They have an affinity for performances and composition. Music education majors are often inquisitive, analytical, observant, able to think abstractly, able to draw, and enjoy coordinated activities and sports. Often artistic, this kind of person enjoys various kinds of art like theatre, types of artwork, and creative expression.

Potential Careers:

Music Education Instruction, Performance, Music Education Royalty and Publishing, Orchestra, Videographer Editor, Vocal Music Education Teacher, Instrumental Music Education, Creative Director, Music Education Therapist, Music Education Video

2. Early Childhood Education

Your Score: 1099

Early childhood development is a major taken by students who wish to work with infants and young children. In order to work with children from birth through to second grade, a student must receive a degree in early childhood development and then become licensed in their state. Licensure in early childhood development allows the student to work in schools, childcare programs or institutional settings. A major in early childhood development will be able to preliminarily evaluate young children to determine if they have special needs such as learning, behavioral, physical or emotional disabilities. Early identification of these problems is critical to the continued growth and development of the child.

Student Profile:

A student who majors in early childhood development must genuinely enjoy working with small children and desire to help them in their growth. Verbal and written communication skills are critical to this major because the student is not only working with the child but with their parents or guardians. This student can be characterized as compassionate, able to motivate children and parents to complete tasks and able to work with all persons concerned with the child in a caring, yet professional way.

Potential Careers:

Child Care Worker, Parent Education Specialist, Public School Teacher, Curriculum Specialist, Parent Program Coordinator, Head Start Program

3. Elementary Education

Your Score: 1099

Elementary education is a major for people who want to become teachers in an elementary school. Students of this major further concentrate their specialty on either special or regular educational teaching services. Each state has a licensure requirement for teachers. Graduation in this major generally fulfills the requirements for someone to qualify for licensure in the state the university is located in. Although curriculum and instruction graduates take many education courses, they also are generally expected to match these courses with a major in another academic field. Preparation in this major trains the student to design, develop and implement instructional programs. The student will learn the most effective ways to communicate with students so they may learn. The curriculum and instruction major learns about how children develop and learn in order to most effectively teach them.

Student Profile:

Elementary education majors like to work with people, are effective leaders, are good with children age 12 and younger. They are organized, can communicate well and possess the power to motivate people.

Potential Careers:

Elementary Teacher- All Subjects, Middle School Teacher- All Subjects, Supervising Teacher, Elementary Teacher-Special Ed, Middle School Teacher- Special Ed, Pre-school Teacher, Kindergarten Teacher

4. Secondary Education

Your Score: 1099

A specialization in secondary education leads to certification for teaching at the high school level. In some states this may include teaching at the middle school or junior high school level, as well. Students are introduced to a variety of philosophies and approaches to secondary education through coursework and field experiences and to a wide variety of students from diverse backgrounds. Reflective teaching at the secondary level is important to ensure that pupils engage in maximal educational experiences as they prepare to enter adulthood. Professional educators are needed who are able to meet the challenges presented by a changing society, while adhering to sound instructional practice. High school teachers are certified by the state they wish to teach in. This major generally requires that a student also obtain a major in an academic discipline that is taught at the secondary school level (e.g., Social Studies, English, Biology, Physics or Mathematics)

Student Profile:

Individuals in this major have an interest in teaching and continuing their involvement in the area of education. As professional instructors they will contribute to keeping today's children well prepared for the future through education and perhaps a little personal creativity. These people enjoy the prospect of teaching and making as good of a positive impact on their students' futures as possible.

Potential Careers:

Art Instructor, English Instructor, Math Instructor, Physical Education Instructor, Principal, Curriculum Designer, Science Instructor, Social Science Instructor, Drama Instructor, Foreign Language Instructor

5. Special Education

Your Score: 1077

Special Education is centered on the education of behaviorally difficult, mentally disabled, physically disabled and learning impaired students. A specialized kind of teacher, this person must have great patience with children with all kinds of conditions, and is their responsibility to ensure that the education these children receive is a thorough and complete one.

Student Profile:

In this major, many individuals in this field will be presented the challenge of educating students with significant learning disabilities. Students in this major have a high desire to help students, children and adults, who require special attention and increased levels of support in order to become productive citizens. There is a high demand for qualified teachers in this area.

Potential Careers:

Rehabilitation Services, Special Education Teacher, Early Interventionist, Teacher of the Gifted and Talented, Rehabilitation Counseling, Resource Specialist Teacher, Educational Therapist

6. Music

Your Score: 1038

Individuals who choose music as a major are in for a field full of diverse styles, methods, cultures, and themes in varying types of music. Virtually any type of musical instrument and ways of playing it can be learned in this major, and the experience is often carried on throughout the major. Vocal music may also be studied for group or individual performances. For the music major, the history, theory, and composition of music that is intended to provide an extensive background in the art form for students who may go on to professional careers as composers, performers, or scholars, or who may enter fields in which a solid grounding in music is essential, such as arts management or publishing.

Student Profile:

This major is a favorite of people who, obviously, have a love of music, performance, and composition. Music majors are often inquisitive, analytical, observant, able to think abstractly, able to draw, and enjoy coordinated activities and sports. Often artistic, this kind of person enjoys various kinds of art like theatre, types of artwork, and creative expression.

Potential Careers:

Music Instruction, Orchestra, Videographer Editor, Performance, Creative Director, Music Therapist, Vocal Music Teacher, Instrumental Music, Music Royalty and Publishing

7. Social Work

Your Score: 992

Graduates of this major seek to benefit society through service, education and research in socially beneficial programs. Students are prepared for entry level social work positions in organizations such as social welfare, child correction, community health agencies, and in this major, one works with individuals, families, groups and communities and cultural and ethnic minorities. Social work is unified by a common core of social work values, knowledge and methods, all of which stress the need to protect the welfare of individuals, to preserve the family, to respect cultural diversity. This profession educates individuals to be change agents who can bring about positive social change. The profession provides an array of individuals who find themselves or their families to be at risk.

Student Profile:

Individuals who enjoy helping and empowering people who are dealing with such issues as personal or family dysfunctionality, will enjoy this major. Through positive acts like therapy and positive intervention, these issues can be remedied and even prevented from occurring if they are caught in time. Individuals in this major are usually outgoing, energetic, and very friendly and people oriented.

Potential Careers:

Social Worker, Family Therapist, Veterans Administration Specialist, Employment and Training Specialist, Medical Center Social Worker, Family Counselor, Alcohol and Drug Counselor, Employee Assistance Counseling, Child Welfare Worker, Church Social Worker

8. Dance

Your Score: 958

Dance programs provide students with the opportunity to study dance in order to dance as artists, become teachers of dance or to study further as scholars. The field of dance includes training in both traditional and non-traditional dance. While focusing on the development of performers, choreographers and educators, dance programs also encourage the emergence of new, diverse and creative dance techniques and styles. Dance students also enrich the cultural life of the campus and the community. Because dance is such a physically strenuous activity, many dancers retire at an early age. Most dancers desire a college degree in dance in order to remain in the field after they retire. A dance degree is a liberal arts degree usually housed in the college of music, theatre or dance. Although a college degree in dance is not necessary to perform, it is necessary for those who want to teach dance in college, high school or elementary schools. A dance degree also provides a foundation for those who want to develop a career in the arts, but not necessarily perform.

Student Profile:

Students who major in dance are creative, imaginative and expressive. These students are able to express their artistic abilities by drawing, painting, movement, and performance. These students enjoy hobbies that include attendance at live performance or art exhibits. They must be physically well conditioned to perform well.

Potential Careers:

Ballet, Jazz Dance, Folk Dance, Classical Dance, Opera, Tap Dance, Contemporary Dance, Popular Dance, Ethnic Dance

9. Film, Cinema and Video

Your Score: 866

We live in a culture that is dominated by visual media as our chief source of entertainment and information. It is, therefore, a popular art forms. Film studies is at once, a cross-cultural and multi-disciplinary study, which combines the study of film, television, and video. It integrates the historical and theoretical analysis of one of our most significant media with the art and practice of film and video production. Film studies focuses on the study of cinema both as an art form and as a form of mass culture. The study of film as art is concerned with the relationships among film style, narrative form, and the material practices that shape the medium. The study of film as mass culture explores the ways in which film expresses societal values and as a litmus for processes of social change.

Student Profile:

Potential Careers:

Journalist, Film Maker, Special Effects Director, Public Relations, Advertising, Lighting and Set Management, Screen Writing

10. Sociology

Your Score: 846

The study of the structure of society and its enduring patterns of social relations is sociology's primary mission. Sociology studies human conduct from the perspective of the history and the anatomy or structure of the groups. It focuses on how people coordinate their activities to reach individual and collective goals through the development of roles, meanings, and norms that make behavior reciprocally predictable and organized. Sociology investigates questions such as how such patterns of interdependent activity originate and what sustains them, why they take one shape instead of another, how some societies change more rapidly than others, how groups are related to each other, and how people justify and explain what they are doing. The patterns are learned as customary behavior and institutional practices. The sociological perspective is closely linked to comparative historical and cross-cultural studies of social institutions and to psychological studies of human interaction in a wide range of social, economic, educational, religious, familial, and political settings.

Student Profile:

This major is of interest to the individual who is observant of other people's actions when they interact with each other and who is looking for patterns and consistencies in their interaction. This is the primary field of choice. Sociology is the study of this as well as many other aspects of human interaction taking into account things like race, gender, setting, upbringing, etc. The individual who is curious about this will learn many things in this field, and will be trained to use the knowledge gained advantageously.

Potential Careers:

Teaching, Demographer/Planner, Political Research, Applied Sociologist, Business, Counseling, Social Service, Journalism

My College Preferences

Mary, you are still considering where to attend college.

You are interested in a campus in a medium sized city located in CT,CA, and TX.

A school based in Catholic beliefs would be preferred.

You indicated that you would prefer a large school (10,000 students or more) at a State College/University,Private College/University.

You have requested information from the following Colleges:

You have not selected any schools yet. To request more information, click the button below.

My Interests and Personality

What you enjoy in and out of the classroom will be a key indicator of future success in classes you take in college and you career you pursue after college.

Extra-Curricular Activities

Child Care
Dance
Music
Outdoors
Travel

My Values & Preferences

Preferences and Values

Group Size
Problem Types
Work Environment
Theoretical or Concrete Things
Biological or Organizational
Creative or Structured
Age Group

Student Selection

Work in small groups
Help people solve personal problems
Prefer to work outdoors
Either concrete or theoretical things
Definitely organizations/groups
Either logical or creative
Definitely work with children

Clear Connection to a Career
Exert Power & Authority
Work on Self-Initiated Projects
Speak to & Facilitate Groups
Engage in High Stress, Risky Activities
Use Manual & Mechanical Skills
Interested in Military Service
Participate in Sports
Maintain Hard Working Study Skills
Study Different Peoples & Cultures
Engage in Religious Activities
Teach children, young people or adults

My Next Steps:

- Research specific Majors to understand if program is your best path.
- Find Colleges or Universities that offer your Major. Request information from Colleges you wish to attend on MyMajors.
- Plan your graduation requirements and courses to make sure you are on track to graduate. Break out each semester with set courses to complete to stay on track for completion.
- Ask Questions - speak with Advisor or individual already enrolled in your intended major.
- What career opportunities fit my plan based on my abilities and strengths? Find the skills, abilities, knowledge, and required education on career pages on MyMajors.
- Gain experience through internship or job shadow.
- Apply to the right College by researching the 7,500 different Colleges and Universities.
Visit: www.mymajors.com/blog.

"84% of students think they will graduate in 4 years. Only 38% actually graduate in 4 years" (UCLA) To learn more about completing your degree in 4 years visit our [College Completion Tips online](#).
